SHARMILA RAGAVAN

Data Analyst

+91 9345271036 | sharmilaragavan4@gmail.com | LinkedIn Profile | Chennai, Tamil Nadu

CAREER OBJECTIVE

Aspiring Data Analyst (2026 Batch, B.Com CGPA 8.40) skilled in Python, SQL, Power BI (DAX, Power Query, Data Modeling), and Excel, with hands-on experience in data cleaning, transformation, EDA, KPI dashboard development, and stakeholder reporting. IBM-certified in Data Analysis with Python. Seeking an entry-level role to generate actionable insights supporting data-driven decision-making.

SKILLS

Languages:	Python (Pandas, NumPy, Matplotlib, Seaborn) | SQL (Joins, Subqueries, Aggregates, CRUD, Stored Procedures)
BI & Viz:	Power BI | DAX (Measures, Calculated Columns, Time Intelligence) | Power Query | Data Modeling | KPI Dashboards
Data Analysis:	EDA | Data Cleaning & Transformation | Outlier Detection (IQR) | Statistical Analysis | Reporting
MS Office:	Excel (Pivot Tables, VLOOKUP, HLOOKUP, Data Validation, Conditional Formatting) | PowerPoint | Word
Soft Skills:	Analytical Thinking | Problem Solving | Attentions To Detail | Communication

PROJECTS

E-Commerce Orders End-to-End Analysis | Python, SQL & Power BI 2026

- Performed end-to-end analysis on e-commerce orders dataset using Python (Pandas, Matplotlib, Seaborn) for data cleaning, EDA, and outlier detection; used SQL (Joins, Aggregates, Stored Procedures) to query and transform sales, customer, and product data across multiple tables.
- Built an interactive Power BI dashboard with DAX measures to track KPIs — Total Revenue, Order Volume, Customer Retention, and Regional Sales Trends; automated reporting pipeline eliminating manual data compilation and enabling data-driven business decisions.

Capital Flow Analysis — Indian Startup Ecosystem | Power BI 2026

- Built an end-to-end Power BI dashboard for 1000+ startup funding records using Power Query for ETL and a star-schema data model; developed DAX measures to compute KPIs — Total Amount Funded, Total Deals, YoY Growth %, Average Deal Size.
- Identified top investors, leading industries, and funding distribution trends, translating business requirements into dynamic interactive visuals for stakeholder reporting.

Rural Loan Dataset Analysis | Python 2025

- Cleaned 1,000+ raw loan records using Pandas (IQR outlier detection, null handling, column pruning); applied GroupBy aggregations to examine the relationship between loan amount and household size.
- Visualized housing and infrastructure trends using Matplotlib and Seaborn bar and pie charts; compiled findings into a structured analytical report.

Dairy Data Analytics Solution | SQL & Power BI 2026

- Authored SQL stored procedures for ETL pipeline; built Power BI dashboards with DAX time-intelligence functions (YTD, MTD, QTD) eliminating manual monthly reports.
- Performed advanced data transformation and modeling; implemented calculated measures and period-over-period KPI comparisons ensuring data accuracy across all reports.

EDUCATION

Bachelor of Commerce (B.Com) CGPA: 8.40 / 10 2022 – 2025
VIT University, Vellore

HSC (State Board) | 87.3% 2021 – 2022
Government Girls Higher Secondary School

CERTIFICATIONS

- Data Analyst Certification — SLA Institute (2026) | SQL, Power BI, Python, Excel, ETL, Data Modeling
- IBM Data Analysis with Python — IBM / Coursera (2026) | Pandas, NumPy, EDA, Data Cleaning, Visualization
